

## **Telephone Conference: CoC Drafting Group**

**22 February 2018**

### **Summary Report**

Working groups provided updates with regards to progress made and status of their respective texts. It was confirmed that the drafting style of the Code should take a FAQ approach with concrete examples, an approach which DG Justice and DG RTD support. Furthermore, there has been indication from the European Commission that there are no other Codes of Conduct in the field of health research, emphasising the importance of the current Code.

The GEANT Code of Conduct, which is aimed at service providers in the IT field, was discussed as a reference point. Drafting Group members were encouraged to look at this Code given it was available for public consultation.

Upcoming deadlines and meetings within working groups were discussed, along with the next face to face meeting for all Drafting Group members.
