

## Meeting: CoC Drafting Group

30-31 July, Brussels

### Summary Report

Texts from sub-groups were compiled to have a first initial working draft of the Code of Conduct for Health Research. During the course of the meeting, sub-group leaders outlined sections on:

- Glossary;
- Data Controller and Processors;
- Legal Bases;
- Informed Consent;
- Anonymisation and Pseudonymisation; and
- Informational Obligations.

Discussions took place on the above topics, and Drafting Group members provided their input. Working examples were also shared and discussed within the context of the above issues. The Code was refined during the meeting. It was agreed that sub-groups would continue to work on their sections based on input received following the face to face meeting, and then share updated drafts with Drafting Group.
